Aboveground LPG Tanks

LPG Storage Tank

Available capacities: 10 m³ to 50 m³

ITYA LPG's aboveground storage tanks are installed at grade for straightforward access and maintenance. Each tank is equipped with one or two pumps, selected to match the installation's flow rate and distribution volume.

CAPACITY RANGE	INSTALLATION	PUMPS
10 – 50 m³	**Aboveground**	**1 or 2**

FEATURES

- Aboveground installation
- Equipped with 1 or 2 pumps to match different flow rates and distribution volumes

ITYA LPG designs LPG storage and transport tanks for underground, aboveground and road-transport installations.
