Underground LPG Tanks

LPG Storage Tank

Available capacities: 10 m³ to 50 m³

ITYA LPG's underground storage tanks are designed for buried installation, keeping the tank below grade for a reduced site footprint and added safety. Each tank is equipped with one or two pumps, sized to the installation's operating requirements.

CAPACITY RANGE	INSTALLATION	PUMPS
10 – 50 m³	**Underground (buried)**	**1 or 2**

FEATURES

- Buried (underground) installation
- Equipped with 1 or 2 pumps, depending on operating requirements

ITYA LPG designs LPG storage and transport tanks for underground, aboveground and road-transport installations.
